Well then Our first jump is the Axel
It is the starting point for any forward-facing high jump
Of the six kinds of jumps the only one starting forward,
the Axel has the distinction of being relatively easy
If we were to speak of the Triple Axel, then of course it would be about Asada Mao-chan. Mao-chan's jumps were character-ized by a flutter in her high flight, as if she were dancing
The pioneer Itou Midori-san. Midori-san's 3A can be seen even now on YouTube, and the speed, height and breadth are all so very incredible
